SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/21/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

10/068,061

Applicant(s)

CANFIELD, JAMES W.

Examiner

Muriel Tinkler

Art Unit

3691

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 February 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-37 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-37 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 5/6/2002.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____.

DETAILED ACTION

This application has been reviewed. The original claims 1-37 are pending. The rejections are as stated below.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-11 and 28-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Kahn et al. (US 6,401,079 B1).

3. Claim 1 discusses a method for using a computer apparatus for managing access to payroll data and direct deposit data for a plurality of employees over a network, the method comprising: maintaining a computer system that is capable of sending and receiving data over the network; storing in the computer system employee identification data, payroll data, and direct deposit data corresponding to each employee, and criteria for direct deposit payroll participation; receiving over the network employee identification data from an employee; matching the received employee identification data to the corresponding payroll data and direct deposit data in the

Art Unit: 3691

computer system; determining whether the direct deposit data for the employee satisfies the criteria for direct deposit payroll participation; and if the employee direct deposit data satisfies the criteria, sending the corresponding payroll data over the network to the employee. Kahn et al. discloses:

- maintaining a computer system that is capable of sending and receiving data over the network as a personal computer equipped with hardware and software to provide an interactive connection to the Internet in figure 1 and column 11 (lines 34-49);
- storing in the computer system employee identification data, payroll data, and direct deposit data corresponding to each employee, and criteria for direct deposit payroll participation in column 11 (lines 50) through column 14 (line 19);
- receiving over the network employee identification data from an employee in the Abstract and column 11 (lines 27-33 and lines 59-67) and column 12 (lines 1-10);
- matching the received employee identification data to the corresponding payroll data and direct deposit data in the computer system in column 11 (line 57) through column 12 (line 10 and lines 45-60);
- determining whether the direct deposit data for the employee satisfies the criteria for direct deposit payroll participation and if the employee direct deposit data satisfies the criteria, sending the corresponding payroll data over the network to the employee in column 27 (lines 17-22), column 45 (lines 10-34), column 46 (lines 66 and 67), column 47 (lines 1-11), column 49 (lines 52-67), column 50 (lines 1-7), column 50 (lines 61-67) and column 51 (lines 1-13).

Art Unit: 3691

4. Claim 2 discusses the method of claim 1 wherein the computer system is capable of receiving direct deposit data from the employees over the network. Claim 1 has been rejected based on the discussion(s) above. Kahn discloses this in figure 1, figure 38, column 3 (lines 41-67), column 11 (lines 27-67) and column 12 (lines 1-10).

5. Claim 3 discusses the method of claim 2 further comprising the step of providing the employee confirmation of the direct deposit data received from the employee. Claim 2 has been rejected based on the discussion(s) above. Kahn discloses this in column 24 (lines 54-63), column 50 (lines 8-29) and column 51 (lines 47-63).

6. Claim 4 discusses the method of claim 2 wherein the direct deposit data received from the employees comprises RTNs. Claim 2 has been rejected based on the discussion(s) above. Kahn discloses this in column 11 (lines 59) through column 12 (lines 10).

7. Claim 5 discusses the method of claim 4 further comprising the step of identifying invalid RTNs in the direct deposit data from the employees and notifying the employee. Claim 4 has been rejected based on the discussion(s) above. Kahn discloses the information in claim 4 and checking for errors in the bank routing number in column 30 (lines 14-22), column 46 (lines 66 and 67), column 47 (lines 1-11). Kahn also discloses the use of a 'history' or archived backup and error messages in case of a user entry

Art Unit: 3691

error in figure 26(b), column 25 (lines 8-16), column 27 (lines 64-67) and column 28 (lines 1-7).

8. Claims 6 and 7 discusses the method of claim 2 wherein the criteria for direct deposit payroll participation may be input by an employer of the employee. Claim 2 has been rejected based on the discussion(s) above. Kahn discloses this in the Abstract, column 1 (lines 47-57), column 5 (lines 25-35) and column 6 (lines 1-23).

9. Claims 8 and 9 discuss the method of claim 2 wherein the direct deposit data received from the employee comprises a description generated by the employee for each direct deposit account. Claim 2 has been rejected based on the discussion(s) above. Kahn discloses showing a section under 'Bank Name' to describe the various bank accounts of the employee in figure 38 and column 11 (line 59) through column 12 (lines 10).

10. Claims 10 and 11 discuss the method of claim 2 further comprising the step of storing in the computer system W-2 and W-4 data corresponding to each employee, and wherein if the employee direct deposit data satisfies the criteria, the employee is provided access to the W-2 data corresponding to the employee. Claim 2 has been rejected based on the discussion(s) above. Kahn discloses this in column 20 (lines 8-15), column 21 (lines 31-49), column 35 (lines 17-67) and claim 4.

Art Unit: 3691

11. Claim 28 discusses a method for using a computer apparatus for managing access to payroll data and W-4 data for a plurality of employees over a network, the method comprising: maintaining a computer system that is capable of sending and receiving data over the network; storing in the computer system employee identification data, payroll data, and W-4 data corresponding to each employee, and criteria for W-4 participation; receiving over the network employee identification data from an employee; matching the received employee identification data to the corresponding payroll data and W-4 data in the computer system; determining whether the W-4 data for the employee satisfies the criteria for W-4 participation; if the employee W-4 data satisfies the criteria, sending the corresponding payroll data over the network to the employee. See the rejections of claims 1 and 11 above.

12. Claim 29 discusses the method of claim 28 wherein the computer system is capable of receiving W-4 data from the employees over the network. Claim 28 has been rejected based on the discussion(s) above. See the rejection of claim 2 above.

13. Claim 30 discusses the method of claim 29 further comprising the step of providing the employee confirmation of the W-4 data received from the employee. Claim 29 has been rejected based on the discussion(s) above. See the rejection of claim 3 above.

Art Unit: 3691

14. Claim 31 discusses the method of claim 28 wherein the criteria for direct deposit payroll participation may be input. Claim 28 has been rejected based on the discussion(s) above. See the rejection of claim 6 above.

15. Claim 32 discusses the method of claim 31 wherein the criteria may be input by an employer of the employee. Claim 31 has been rejected based on the discussion(s) above. See the rejection of claim 7 above.

16. Claim 33 discusses the method of claim 28 further comprising the step of storing in the computer system W-2 data corresponding to each employee, and wherein if the employee W-4 data satisfies the criteria, the employee is provided access to the W-2 data corresponding to the employee. Claim 28 has been rejected based on the discussion(s) above. See the rejection of claim 10 above.

Claim Rejections - 35 USC § 103

17. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

18. Claims 12 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kahn in view of Vasic (US 2001/0034676 A1).

19. Claim 12 discusses the method of claim 2 wherein if the employee direct deposit data satisfies the criteria, the employee is provided access to income verification services. Claim 2 has been rejected based on the discussion(s) above. Kahn does disclose the information in claim 2 and providing access to services. Kahn does not specifically disclose the term "income verification". Vasic teaches the use of income verification in paragraph 67. Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Kahn in view of Vasic to use income verification for convenience and security.

20. Claim 34 discusses the method of claim 28 wherein if the employee W-4 data satisfies the criteria, the employee is provided access to income verification services. Claim 28 has been rejected based on the discussion(s) above. See the rejection of claim 12 above.

21. Claims 13-21, 25, 26 and 35-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kahn in view of Gates et al. (US 6,411,938 B1).

22. Claims 13 and 35-37 discuss a method for using a computer apparatus and computer based system for managing access to payroll data and direct deposit data for a plurality of employees over a network, the method comprising: maintaining a computer system that is capable of sending and receiving data over the network; storing in the

Art Unit: 3691

computer system employee identification data, payroll data, direct deposit data, and reference date data corresponding to each employee, and criteria for direct deposit payroll participation; inputting in the computer system data corresponding to a time interval for each employee, during which interval following the reference date, if the direct deposit data for the employee does not satisfy the criteria for direct deposit payroll participation, the employee may receive payroll data; receiving over the network employee identification data from an employee; matching the received employee identification data to the corresponding payroll data and direct deposit data in the computer system; determining whether the direct deposit data for the employee satisfies the criteria for direct deposit payroll participation; if the employee direct deposit data satisfies the criteria, sending the corresponding payroll data over the network to the employee; and if the employee direct deposit data does not satisfy the criteria, determining whether the employee time interval following the employee reference date has expired, and if the time interval has not expired, sending the corresponding payroll data over the network to the employee.

23. Kahn discloses: maintaining a computer system that is capable of sending and receiving data over the network; storing in the computer system employee identification data, payroll data, direct deposit data, and reference date data corresponding to each employee, and criteria for direct deposit payroll participation; receiving over the network employee identification data from an employee; matching the received employee identification data to the corresponding payroll data and direct deposit data in the

Art Unit: 3691

computer system; determining whether the direct deposit data for the employee satisfies the criteria for direct deposit payroll participation; and if the employee direct deposit data satisfies the criteria, sending the corresponding payroll data over the network to the employee. See the rejection of claim above.

24. Kahn also discloses inputting in the computer system data corresponding to a time interval for each employee, during which interval following the reference date, if the direct deposit data for the employee does not satisfy the criteria for direct deposit payroll participation, the employee may receive payroll data. Kahn specifically discloses, employees receiving payroll data in the form on a check, in the Abstract, Background, Summary, figures [40(c), 41(c), 45(a), 46(a) and 46(b)], and column 12 (lines 28-33).

25. Kahn does not disclose that if the employee direct deposit data does not satisfy the criteria, determining whether the employee time interval following the employee reference date has expired, and if the time interval has not expired, sending the corresponding payroll data over the network to the employee. Gates teaches this, specifically Gates talks about setting a time period and sending payroll data to an employee before that time period expires, in column 9 (lines 45-63). Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Kahn in view of Gates to payroll data to be sent over a network within a given time period because there may be a previous agreement to do so and because limiting the timeframe for sending payroll data can improve security.

26. Claim 14 discusses the method of claim 13 wherein the computer system is capable of receiving direct deposit data from the employees over the network. Claim 13 has been rejected based on the discussion(s) above. Kahn discloses receiving direct deposit data from the employees over the network. See the rejection of claim 2 above.

27. Claim 15 discusses the method of claim 14 further comprising the step of providing the employee confirmation of the direct deposit data received from the employee. Claim 14 has been rejected based on the discussion(s) above. Kahn discloses providing the employee confirmation of the direct deposit data received from the employee. See the rejection of claim 3 above.

28. Claim 16 discusses the method of claim 14 wherein the direct deposit data received from the employees comprises RTNs. Claim 14 has been rejected based on the discussion(s) above. Kahn discloses direct deposit data received from employees comprising RTNs. See the rejection of claim 4 above.

29. Claim 17 discusses the method of claim 16 further comprising the step of identifying invalid RTNs in the direct deposit data from the employees and notifying the employee. Claim 16 has been rejected based on the discussion(s) above. Kahn discloses identifying invalid RTNs in the direct deposit data from the employees and notifying the employee. See the rejection of claim 5 above.

30. Claim 18 discusses the method of claim 13 wherein the criteria for direct deposit payroll participation may be input. Claim 13 has been rejected based on the discussion(s) above. Kahn discloses that the criteria for direct deposit payroll participation may be input. See the rejection of claim 6 above.

31. Claim 19 discusses the method of claim 18 wherein the criteria may be input by an employer of the employee. Claim 18 has been rejected based on the discussion(s) above. Kahn discloses that the criteria may be input by an employer of the employee. See the rejection of claim 7 above.

32. Claim 20 discusses the method of claim 13 wherein the direct deposit data received from the employee comprises a description generated by the employee for each direct deposit account. Claim 13 has been rejected based on the discussion(s) above. Kahn discloses that the direct deposit data received from the employee comprises a description generated by the employee for each direct deposit account. See the rejection of claim 8 above.

33. Claim 21 discusses the method of claim 20 wherein the payroll data sent over the network to the employee comprises the description generated by the employee for each direct deposit account. Claim 20 has been rejected based on the discussion(s) above. Kahn discloses that the payroll data sent over the network to the employee comprises

Art Unit: 3691

the description generated by the employee for each direct deposit account. See the rejection of claim 9 above.

34. Claim 25 discusses the method of claim 13 further comprising the step of storing in the computer system W-2 data corresponding to each employee, and wherein if the employee direct deposit data satisfies the criteria, the employee is provided access to the W-2 data corresponding to the employee. Claim 13 has been rejected based on the discussion(s) above. Kahn discloses storing in the computer system W-2 data corresponding to each employee, and wherein if the employee direct deposit data satisfies the criteria, the employee is provided access to the W-2 data corresponding to the employee. See the rejection of claim 10 above.

35. Claim 26 discusses the method of claim 13 further comprising the step of storing in the computer system W-4 data corresponding to each employee, and wherein if the employee direct deposit data satisfies the criteria, the employee is provided access to the W-4 data corresponding to the employee. Claim 13 has been rejected based on the discussion(s) above. Kahn discloses storing in the computer system W-4 data corresponding to each employee, and wherein if the employee direct deposit data satisfies the criteria, the employee is provided access to the W-4 data corresponding to the employee. See the rejection of claim 11 above.

36. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kahn and Gates as applied to claim 13 above, and further in view of Olsen et al (US 7,146,336 B2).

37. Claim 22 discusses the method of claim 13 wherein if the employee direct deposit data does not satisfy the criteria and the time interval has not expired, the remaining time interval is displayed to the employee. Claim 13 has been rejected based on the discussion(s) above. Gates discloses the information in claim 13 and the use of defining various types of accounts. Gates does not specifically disclose the use of displaying the remaining time-interval data to the employee. Olsen et al. teaches the use of displaying the remaining time-interval data to the employee in column 16 (lines 3-12). Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Kahn and Gates in view of Olsen et al. because displaying the remaining time-interval data to the employee makes it clear to the employee the exact time left to enter appropriate direct-deposit data.

38. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kahn and Gates as applied to claim 13 above, and further in view of Stoutenburg et al. (US 6,829,588 B1).

39. Claim 23 discusses the method of claim 13 wherein the direct deposit data comprise an option for pay distribution to a stored value card. Claim 13 has been

Art Unit: 3691

rejected based on the discussion(s) above. Gates discloses the information in claim 13 and the use of defining various types of accounts. Gates does not specifically disclose the use of a stored value card. Stoutenburg et al. teaches the use of a stored value card in the Background Art, figure 1 (element 22), column 4 (lines 9-62), column 6 (lines 35-55), claim 12 and claim 27. Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Kahn and Gates in view of Stoutenburg because a stored value card is convenient and allows temporary employees, transient employees and employees without bank accounts to access their money quicker.

40. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kahn and Gates as applied to claim 13 above, and further in view of Khemlani et al. (US 6,772,146 B2).

41. Claim 24 discusses the method of claim 13 wherein the corresponding payroll data is displayed in fields and the data comprises hyperlinks to definitions associated with one or more of the fields. Claim 13 has been rejected based on the discussion(s) above. Gates discloses the information in claim 13 and the use of defining various types of accounts. Gates does not specifically disclose the use of hyperlinks. Khemlani et al. teaches the use of hyperlink to a definition in figure 2(p) [element 230], figure 2(pa) and column 12 (lines 41-46). Therefore it would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify Kahn and

Art Unit: 3691

Gates in view of Khemlani et al. because hyperlinks are a quick and convenient way for the employee to access these definitions without taking up too much space on the main website.

42. Claim 27 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kahn and Gates as applied to claim 13 above, and further in view of Vasic.

43. Claim 27 discusses the method of claim 13 wherein if the employee direct deposit data satisfies the criteria, the employee is provided access to income verification services. Claim 13 has been rejected based on the discussion(s) above. Claim 13 has been rejected based on the discussion(s) above. Vasic discloses that if the employee direct-deposit data satisfies the criteria, the employee is provided access to income verification services. See the rejection of claim 12 above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Muriel Tinkler whose telephone number is (571)272-7976. The examiner can normally be reached on Monday through Friday from 7:30 AM until 4 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571)272-6771. The fax phone

Art Unit: 3691

number for the organization where this application or proceeding is assigned is 571-273-8300.
